**FlameOFF® Fire Barrier Paint**

**Selection & Specification Data**

<table>
<thead>
<tr>
<th><strong>Generic Type</strong></th>
<th>A water-based intumescent coating that consists of a vinyl acetate resin.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Description</strong></td>
<td>A decorative, thin-film intumescent coating designed for fire protection of structural steel for interior applications requiring ASTM E119 testing for full scale/load bearing applications.</td>
</tr>
</tbody>
</table>
| **Features** | • Tested to ASTM E119 / UL 263 standards  
• Decorative aesthetic finish - provides a hard, durable, architectural finish. Compatible with most latex/acrylic topcoats  
• Thin film coating - offers an economical solution to alternative fireproofing  
• low VOC, LEED compliant  
• Easy repair - if damaged, product can be patched easily  
• Does not require reinforcing mesh  
• Third party listing certificate |
| **Color** | White |
| **Finish** | Smooth |
| **Primer** | An alkyd metal or all purpose acrylic primer must be applied to steel before intumescent coating application.  
*For galvanized surfaces use all purpose acrylic primers ONLY. |
| **Topcoat** | For interior conditioned space, topcoating is not required but may be applied for aesthetic purposes.  
Product must be topcoated if there are environmental exposure requirements. Refer to FlameOFF® Coatings, Inc. technical support. |
| **Intumescent coating must be applied to the required DFT and fully cured to a Shore D Hardness of 70 before topcoat is applied.** |
| **Thickess Per Coat** | Recommended 20-35 Mil of WFT  
*Range: 15-45 Mil WFT. Maximum thickness per coat depends upon applicator experience, substrate, and job site conditions. |
| **Solids Content** | By Volume 71% |
| **Theoretical Coverage Rates** | 1138 sq ft/gallon at 1 mil DFT (105,7 m² / 0,25 microns)  
37 sq ft/gallon at 30 mils DFT (3,4 m² / 750 microns) |
| **VOC Values** | As Supplied 0.06 lbs/gal (7 g/l) |

**Testing / Certification / Listing**

- This product is ICC-ES Listed and UL Classified. It has been tested at Underwriters Laboratories in accordance with ASTM E119/UL 263 Fire Endurance requirements to meet the Full Scale requirement of IBC/NFPA Building Codes.

| Testing / Certification / Listing | ASTM E119 2 hours  
ASTM E84 Class A  
ASTM D2240 70 Shore D |

**Packaging, Handling & Storage**

- **Shelf Life**: 12 Months  
*Shelf life when kept at recommended storage conditions and in original unopened containers. |
- **Shipping Weight**: 64 lbs per 5 gal pail |
- **Flash Point**: N/A |
- **Storage**: Store indoors in a dry environment between 40°F and 100°F (7°C and 38°C) |
- **Packaging**: 5 Gal |
- **This product is proudly manufactured in the USA** |

**Mixing & Thinning**

- **Thinng**: DO NOT THIN or alter in any way. |
- **Mixer**: Use 1/2" electric or air driven drill with a slotted paddle mixer (300 rpm under load) |
- **Mixing**: Product must be mixed using a 1/2" electric air driven drill with a slotted paddle or Jiffy mixer blade. Mix material for a minimum of 5 minutes to achieve the necessary texture required before spraying. |

FlameOFF® Coatings, Inc. owns and certifies all data in this document. This document may not be altered by anyone other than FlameOFF® Coatings, Inc.

The data and suggested formulations in this bulletin are based on information believed to be reliable and are offered solely for evaluation, investigation and verification of numerous factors affecting results. FlameOFF® Coatings, Inc. products are sold with the understanding the purchasers will make their own tests to determine the suitability of these products for the particular use. We assume no liability or responsibility for any damage to person or property resulting from or incident to the use of our products. Statements concerning the use of FlameOFF® Coatings, Inc. products are not be construed as recommending the infringement of any patent, and no liability for infringement arising out of any such use is assumed.

Revised 6/1/2020
Substrates & Surface Preparation

General
All surfaces must be primed and must be clean, dry, and free of oil, grease, loose scale, dirt, dust or other materials that would impair the bonding of the intumescent coating to the substrate.

Application Conditions and Curing Schedule

</tbody>
</table>

*Curing times are dependent upon temperature, ventilation, and humidity. Lower temperatures will slow down the curing process, higher temperatures will speed up the curing process. Additional ventilation (add fan) may expedite the curing process. For optimum curing, it is recommended to apply coats at 20-45 mils wet per coat. Material is ready to be recoated when an average Shore D hardness of 70 is achieved.

**See Application Guide for full application details.

Application Equipment Guidelines

General equipment guidelines are given below, and may need to be modified depending on individual job site conditions. See Application Guide for full application details.

Contact FlameOFF® Coatings with any questions.

Airless Spray
Use 1.0 gal. per minute electric airless (minimum) to provide an operating pressure of 3,000 p.s.i. (140 kg/cm²).

**Remove rock catcher from siphon tube.**

Spray Gun
Contractor Gun (with filter removed) or equivalent

Spray Tips
0.021” - 0.025”

Fan Size
4”-10” (depending on section being sprayed)

Hose Length
50’ (15 m) maximum

Material Hose
1/2” I.D.

**Listed here are general equipment guidelines for the application of this product. Job site conditions may require modifications to these guidelines to achieve the desired results.**

Cleanup & Safety

Cleanup
Flush pump, gun, tips, hoses and mixer with hot water at least once per day.

Safety
Follow all safety precautions on the product Material Safety Data Sheet.

Overspray
All adjacent and finished surfaces shall be protected from damage and overspray.

Maintenance

General
If coating becomes damaged, rebuild the required thickness by spray or brush. When dry, smooth and finished, topcoat may be applied. The repair area must follow all surface preparation requirements before reapplying the coating. The coating must be built back to the original thickness.
