

FR Clear

Clear Fire retardant coatings/spray

FlameOFF® FR Clear is a fire retardant coating that is best applied to wooden surfaces and on other natural or synthetic materials. With FlameOFF® FR Clear, users can benefit from the safety of a fire-resistant coating, with a clear finish that allows materials to maintain their original colors, appearance, and durability. This anti-fire technology protects wood and other materials but is also environmentally friendly and non-toxic.

FlameOFF® FR Clear is effective in protecting construction materials from the spread of fire. It maintains the original properties of the materials used.

Why FR Clear

Prolong the life of structures made out of wood and other materials. Reduce fire danger on construction sites, and for long after projects are completed. Made for commercial, industrial, and residential uses for applicators, architects, building officials, general contractors, and others.

How to Apply

FlameOFF® FR Clear is odorless, lightweight and may be applied by using a size press, pad, dip, shower spray or spray bottle application. Usage rates of this product may vary between 300-600 SQFT/GALLON Depending on pickup and type of material construction. Surface must be dry to the touch prior to application.

-  An eco-friendly clear, water based, raw wood and fabric spray treatment, non-toxic to humans or the environment
